

MD to PDF — Premium Export Skill

Export Markdown (`.md`) files to professional, beautifully styled PDF documents using the **Markdown PDF** extension in VS Code.

Prerequisites

- **VS Code Extension:** `yzane.markdown-pdf` (Markdown PDF) must be installed.
- Install via: `Ctrl+Shift+X` → search "Markdown PDF" → Install the one by **yzane**.

Setup

Step 1: Add Settings to VS Code

Open your **User Settings** (`Ctrl+Shift+P` → "Preferences: Open User Settings (JSON)") and add:

```
{
  "markdown-pdf.styles": [
    "C:\\Users\\USER\\.gemini\\config\\skills\\md-to-pdf\\resources\\markdown-pdf-premium.css"
  ],
  "markdown-pdf.highlightStyle": "github-dark.css",
  "markdown-pdf.displayHeaderFooter": true,
  "markdown-pdf.headerTemplate": "<div style=\"font-size: 8px; width: 100%; text-align: right; margin-right: 2",
  "markdown-pdf.footerTemplate": "<div style=\"font-size: 8px; width: 100%; text-align: center; color: #999;\"",
  "markdown-pdf.margin.top": "15mm",
  "markdown-pdf.margin.bottom": "15mm",
  "markdown-pdf.margin.right": "15mm",
  "markdown-pdf.margin.left": "15mm"
}
```

Or, add to your **workspace** `.vscode/settings.json` if you only want it for a specific project.

Step 2: Export

1. Open any `.md` file in VS Code.
2. Press `Ctrl+Shift+P` → type "**Markdown PDF: Export (pdf)**" → Enter.
3. Done! The PDF will be saved alongside the `.md` file.

What the Premium CSS Includes

Feature	Description
Typography	Clean font stack (Segoe UI / system fonts), comfortable line-height, justified text
Headings	Styled hierarchy with colored left-border accent, bottom dividers for H1/H2
Tables	Dark gradient headers, alternating row colors, hover effects
Code Blocks	Dark-themed (slate) with rounded corners and subtle shadow
Inline Code	Light background with border, contrasting color
Blockquotes	Blue left-border with tinted background
Links	Blue color, URL shown in parentheses when printed
Images	Centered with subtle shadow and rounded corners
Horizontal Rules	Gradient line effect
Print Layout	Page-break avoidance for headings, tables, code blocks

Customization

Override CSS per-project

Create a second CSS file and add it after the premium CSS:

```
{
  "markdown-pdf.styles": [
    "C:\\Users\\USER\\.gemini\\config\\skills\\md-to-pdf\\resources\\markdown-pdf-premium.css",
    ".vscode/overrides.css"
  ]
}
```

Change Code Highlight Theme

Available themes at [highlight.js demo](#). Examples:

- `"github-dark.css"` (default - dark code blocks)
- `"github.css"` (light code blocks)
- `"monokai.css"` (Monokai dark)
- `"vs2015.css"` (VS Dark)

```
{  
  "markdown-pdf.highlightStyle": "monokai.css"  
}
```

Files

```
md-to-pdf/  
├─ SKILL.md          ← This file  
└─ resources/  
    └─ markdown-pdf-premium.css ← Premium CSS stylesheet
```
